

• BRAND GUIDELINES

# Collins

## *Brand System*

Boost your digital marketing and automation for faster  
business growth.

VERSION 1.0 · JUNE 2026 · PROJECT EBD31AE8

# 01

## Brand identity

Who Collins is, who we serve, and how we stand apart from legacy marketing platforms.

## Identity at a glance

### NAME

Collins

### ONE-LINER

Boost your digital marketing and automation for faster business growth.

### CATEGORY

Digital marketing & growth automation — an all-in-one platform for SEO, ads, CRM, and behavioral tracking.

### ARCHETYPE

Sage (primary) · Creator (secondary)

### MISSION

We help digital marketers and small business owners streamline online operations and accelerate sustainable revenue without hidden costs or unnecessary complexity. Collins transforms scattered marketing efforts into a cohesive growth engine so teams can focus on strategy, not infrastructure maintenance.

### POSITIONING

**The agile, transparent alternative for modern growth teams.**

- Unified ecosystem vs. fragmented tool stacks
- Speed and clarity over enterprise bloat
- Financial predictability with transparent pricing

### AUDIENCE

- **Primary:** Digital marketers and SMB owners deploying SEO, paid ads, and automation quickly.
- **Secondary:** Growth teams needing behavioral tracking beyond basic search visibility.
- **Not for:** Massive enterprises requiring heavy custom development or niche-only SEO toolkits.

### CORE VALUES

1. **Transparency** — honest pricing and clear capability boundaries.
2. **Agility** — rapid deployment without slow support queues.
3. **Empowerment** — automation that replaces spreadsheet chaos.
4. **Clarity** — features that drive conversion, not feature licensing theater.

# 02

## Voice & tone

Professional, trustworthy, and evidence-led — the Sage voice with Creator momentum.

## How Collins speaks

Every touchpoint should feel like a knowledgeable partner: calm, direct, and grounded in measurable outcomes.

### VOICE ATTRIBUTES

- **Clarity** — translate capability into business outcomes, not infrastructure jargon.
- **Transparency** — back claims with specific logic; never overpromise unused features.
- **Pragmatic wisdom** — guide real-world constraints before suggesting full overhauls.
- **Growth-driven confidence** — encouraging, but always evidence-based.
- **Direct accountability** — own limits honestly; offer resolution paths immediately.

### TONE BY CONTEXT

- **Marketing** — energetic yet professional; trust signals over buzzwords.
- **Product UI** — functional and calm; short directive sentences.
- **Documentation** — instructive; steps first, theory second.
- **Errors & limits** — honest, supportive, with clear workarounds.

### USE VOCABULARY

streamline

automate

integrate

transparent

conversion

analytics

actionable

optimize

deploy

### AVOID VOCABULARY

bloat

legacy

siloed

revolutionary

synergy

game-changing

hidden fees

enterprise overhead

### COPY EXAMPLES

**Don't:** "Our platform supports seamless integrations between any third-party tool."

**Do:** "We connect your SEO content directly to paid ads so every click counts toward revenue — without a 10-hour setup"

*spreadsheet."*

**Don't:** "Enterprise-grade value at SMB cost structures."

**Do:** "You get behavioral tracking and CRM syncs; pay for usage you drive, not unused seats."

# 03

## Color system

Neon green for agency surfaces; structured tokens for product UI. Accent discipline in both.

## Color palette

Marketing and landing experiences use the neon dark theme. Application UI follows semantic tokens from

`design.md`.

| AGENCY / MARKETING (DARK NEON) |                                                                                                           |                                   | PRODUCT UI TOKENS (LIGHT / DARK) |                                                                                                             |                                    |
|--------------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------|----------------------------------|-------------------------------------------------------------------------------------------------------------|------------------------------------|
| TOKEN                          | HEX                                                                                                       | ROLE                              | TOKEN                            | HEX                                                                                                         | ROLE                               |

| Text primary                   | <div></div><br>#f0f7eb | Headlines and body dark surface   | Accent                           | <div></div><br>#0060b9 | Primary actions, links, highlights |
| Text secondary                 | <div></div><br>#9aab94 | Support copy, metadata            | Accent muted                     | <div></div><br>#0a407a | Hover and pressed states           |
|                                |                                                                                                           |                                   | Border                           | <div></div><br>#e4e4e7 | Dividers, input outlines           |
|                                |                                                                                                           |                                   | Dark background                  | <div></div><br>#0a0a0a | Dark-mode canvas anchor            |

### COLOR RULES

- Reserve neon green or product blue for primary actions and key data — never as decorative fill across entire layouts.
- Pair accent colors with validated foreground tokens ( `#040806` on neon, `#fafafa` on product blue).

- Use muted surfaces for grouping; keep accent intensity for conversion paths and interactive states only.
- Maintain WCAG AA contrast for all body text in both light and dark themes.

# 04

## Typography

Geometric clarity for hierarchy; neutral readability for long-form and UI copy.

### Type system

| ROLE               | FAMILY              | USE                                                   | WEIGHT  |
|--------------------|---------------------|-------------------------------------------------------|---------|
| Display / headings | Plus Jakarta Sans   | Page titles, section headers, key metrics, navigation | 600–700 |
| Body / UI          | Inter               | Paragraphs, lists, form labels, documentation         | 400–500 |
| Code / tokens      | Consolas, monospace | CSS variables, API snippets, technical handoff        | 400     |

HIERARCHY SAMPLE

**Streamline  
your growth  
stack**

Section title · Plus  
Jakarta Sans

Body copy uses Inter at comfortable line height for dashboards, docs, and marketing pages. Keep tracking slightly negative on large display sizes only.

TYPOGRAPHY RULES

- One display family + one body family — no decorative alternates.
- Use weight and spacing for hierarchy before introducing extra colors.
- Limit line length to ~65–70 characters for long-form reading.
- Preload web fonts for marketing; provide system-ui fallbacks everywhere.

# 05

## Logo usage

The Collins mark pairs neon green energy with clean white geometry. Protect recognition through consistent placement.

## Logo system

Primary asset: `assets/logo.svg` — vector mark with neon green accent stroke and white wordform paths.

### DO

- Maintain clear space equal to half the logo height on all sides.
- Use the approved SVG on dark marketing backgrounds and neutral light surfaces.
- Scale proportionally — minimum ~48px digital, ~12mm print.
- Preserve the neon green accent; it signals brand energy on the mark.

### DON'T

- Stretch, skew, rotate, or add drop shadows to the mark.
- Substitute unapproved colors outside the token system.
- Place the logo on busy imagery without a contrast backing plate.
- Recreate the wordform with alternate type — use the official asset only.

# 06

## Do's & don'ts

Quick compliance guardrails for copy, visual design, and product deliverables.

## Brand guardrails

### COPY

#### DO

- Lead with outcomes — revenue, time saved, conversion lift.
- State pricing and limits plainly; invite scrutiny.
- Tailor messages to SEO → ads → CRM journey stages.

#### DON'T

- Use hype words (“revolutionary”, “disruptive”) without proof.
- Hide costs behind “contact sales” for core tiers.
- Overpromise integrations the unified system cannot deliver today.

### VISUAL

#### DO

- Apply Plus Jakarta Sans + Inter consistently.
- Use accent colors sparingly for CTAs and key metrics.
- Treat whitespace as an active layout element.

#### DON'T

- Fill dashboards with decorative color noise.
- Hard-code hex values — reference design tokens.
- Use placeholder lorem in customer-facing demos.

### PRODUCT

#### DO

- Map UI to CSS variables from `design.md`.
- Ship light and dark themes with parallel structure.
- Document integration paths for non-technical founders.

#### DON'T

- Introduce one-off styles outside the token contract.
- Bury connection logic deep in help centers.
- Ship components that fail contrast in either theme.

# 07

## Handoff & checklist

Final QA before publishing collateral, landing pages, or agent-generated assets.

## Implementation handoff

Read **brand.md** for strategy and voice, then **design.md** for tokens and components. Regenerate this PDF with `npm`

`run brand:pdf`.

### BRAND ALIGNMENT CHECKLIST

- Copy reflects professional, trustworthy Sage tone — no hollow superlatives.
- One-liner and CTAs explain benefit, not generic “Learn more”.
- Typography uses Plus Jakarta Sans (headings) and Inter (body) only.
- Colors map to approved tokens; accent used with discipline.
- Logo asset unchanged; clear space and contrast verified.
- Light and dark UI both meet accessibility contrast requirements.
- Claims align with actual CRM, analytics, and automation capabilities.

### PRIMARY CTA

#### Automate Your Growth Now

Action-oriented label aligned with the core promise of faster, clearer marketing automation.

### SOURCE DOCUMENTS

- `docs/brand.md` — narrative & voice
- `design.md` — visual tokens
- `deliverables/brand-guidelines.html` — PDF source
