2. Accountability
3. Senior craft
4. Speed
5. Partnership

Motion principles

RESTRAINED NEON MOTION

- Motion confirms intent. It never competes with copy or CTAs.
- Glow pulses only on demo stage and active carousel dots.
- Primary buttons: hover lift and glow only. No infinite loops.
- Hyperframe beats crossfade posters and stagger subtitle captions.
- Scroll reveals and stat count-ups run once on load.
- Honor `prefers-reduced-motion` with instant states.

Beat timing

Crossfade duration: 420ms. Subtitle stagger: 45ms steps. Full spec in `docs/design.md`.
