05

MOTION

Restrained neon motion.

Motion confirms intent. It never competes with copy or CTAs.

PRINCIPLES

- Glow pulses and crossfades reinforce the palette.
- No infinite pulse on primary buttons.
- Beat-synced hyperframe storytelling on demo stage.
- Scroll reveals and stat count-up on load.

TIMING TOKENS

TOKEN	VALUE	USE
<code>--duration-fast</code>	200ms	Nav hover, FAQ
<code>--duration-beat</code>	420ms	Hyperframe crossfade
<code>--duration-slow</code>	520ms	Stage glow transition

ANIMATED ELEMENTS

- Demo stage: inset neon ring pulse while playing
- Carousel dots: glow pulse on active dot only
- Subtitle overlays: stagger fade on beat change
- Buttons: hover lift and glow only

REDUCED MOTION

- Honor `prefers-reduced-motion: reduce`
- Instant beat swaps, no crossfade
- Reveals show immediately
- Stat numbers display final values at once
